

# Truck King Pin Press - rotatable ww-75ts

ww-75ts 

- enormously time-saving
- applicable on assembled truck front axle
- especially for heavy models
- rotatable for displaced bolts

## SPECIAL FEATURES

Applicable in all truck workshops. For force fitting and extraction of steering knuckle pins on truck front axles. The truck king pin press ww-75t may be used for assembled and disassembled front axles, and therefore allows universal and time-saving application. The press is rotatable and may therefore also be used for truck models with displaced bolts.
